After some thrashing the basic consensus was: The social chairmen should be allowed to keep their own financial records (open to audit i guess). We should recognize the importance of the social chairmen perhaps with a title VP of social activities. We talked about order of succession but eventually figured the present order is best. The house needs a house pinball representative (responsible to house). This will be an ongoing discussion and all ideas are welcome. Copies of the constitution can be obtained from me (Howard room 332)

MOVING ON

There comes a time in everybody's life when they move on to bigger and better things in their long lifetime. We humans must realize that what we do now is just practice for something entirely different to be done in the future. Do not dwell too much on the present. Remember the past and hope for the future. Many Bakerites of the past have this common flaw. They all seem to return to this brick ladden building many times through their "real lives". At times it is very sickening to we undergraduate mortals. I really can't believe that the real outside world is so boring that these seasoned bakerites must dwell in the past.

We all have a purpose in life. Many frosh lack it, others cherish it. Loyalty above all is the gift of all. You Bakerites should realize that Baker House is the one and only reason for your sanity at MIT. Without Brain Feldmans antics, Tech Motool, John Peltier's hockey ability, Gary Fedder's Van Halen Happy Hours, or Neil Savasta, Scott Sontheimer, Lawrence Stein, or Mark Templers friendship, I would have gone insane a long time ago, and really started to do drugs. Baker House is simply the people who make it, and they are really something.

One thing is sure. I cherish Baker House. But the day I get my diploma, I will look one last time at this brick red building, and walk away realizing that I shall never see MIT or Baker again, and I will cherish the memories.
