KRISTINA--Baker letter needs help! See me before Thanksgiving if you have any ideas.

ROB S.--*****TECHNIC PICTURE****SUNDAY****2:00*****

CHERYL--Thanks for all the cans and bottles donated to the swim team.

TOM--The Baker soda machine is working and it costs 45¢ a can. We have Stan to thank for fixing it.

Professor Reiche next addressed the house. He spoke about the graveness of the recent alcohol-related problems at Baker and stressed the importance of improving policies in order to prevent future problems.

The following are proposals to improve our alcohol policy. By the end of this term or the beginning of next term, surveys will be sent out and discussions will be held by floors to get some feedback on these proposals since for any of this to work, the house as a whole has to be behind it.

(1) Attitudes must change:

- (a) People have to learn to drink responsibly and to handle themselves at parties.
- (b) It is okay and good for someone to ask another who is already considerably drunk to stop drinking (hopefully friends will do this).

(2) In order to help achieve this:

- (a) Possible house sanctions against someone who continues to drink and cause problems have been explored.
- (b) Informally having everyone watch everyone else. In general, we have been very watchful of people outside the house but we have not been as watchful of people who live here. We have to keep an eye on people here as well.
- (c) Selecting a small body of people (by some means) who will be responsible for "keeping their eyes open" at parties and stopping a problem before it starts.
- (d) Restriction that open alcohol must not be allowed outside the front door.
- (e) Restriction that during parties no alcohol be allowed in the main lobby area.

Leo also addressed the house about the problem we had last week at the Pub. He said that there is a lot of feeling to make the campus dry and we don't want to give them an excuse to do so. Up to now, we have had good relations with the CPs who were acting in the right way at the Pub so we have to work to get back on good terms with them.

- (1) Motion by Janet/Yakov to rebudget the \$10 originally budgeted for class day but not spent to athletic miscellaneous: many-few
- (2) **HOLIDAY PARTY** discussion---the party is on Dec. 7th, it's semi-formal, Mo-Town band, non-denominational holiday brush, Santa, presents...

Invitations will be out Sun. or Mon.--\$5 a couple

Hunting Chairman--Brian Miller

The window latch quietly slid open. Johnny still had not lost his touch. He climbed up through the window, his aging body now gliding like a snake. AS he rose to his feet he saw the safe sitting alone in a corner. The only light in the room was the cool moonlight pouring in over his shoulder from the now opened window. There was a faint aroma of a pipe in the air. The night watchman would not be due back for 5 minutes. Two was all he needed. Johnny took out his tools and went to work. Forty-five seconds later, the door of the safe popped open. "wow! There must be 20 G's in there," Johnny thought. He quickly stuffed the money in his bag and headed for the window. Then, perhaps because of carelessness perhaps because his old eyes did not see as sharply as they used to, his foot caught the corner of a table sending the books on it to the floor. Immediately, The night watchman popped through the door brandishing a shiny revolver. Johnny reacted instinctively. Shooting his trusty .45 behind him for cover he dove for the window. It was a pretty rough landing but Johnny was in pretty good shape for a man of his age. Sure, he had gained a few inches around the waist but didn't everybody? As he got up and ran, he realized that he had broken his shoulder. He had to find someplace to lay low for a while. He was fairly sure that the watchman didn't get much of a look at him, but the heat would be pretty heavy for the rest of the night, at least. The best place for him would probably be the little used storehouse behind Pops Wagner's store.

"excuse me. Are you a freshman? You'll have to sign in." the r/o worker said. After the whole team signed in, the conscientious worker asked B.A. "What kind of signature is Mr. T? What is your real name?" "My first name is Mr, my middle name is the little dot, and my last name is T," B.A. scowled. After the girl apologized, she asked the team if they wanted a tour of Baker House. "We'll let Eppy, one of most experienced girls, err I mean tour guides, take you." Eppy came bouncing along and said "Let's all get in the elevator." B.A. started screaming "Hannibal, I ain't gettin in no elevator with that crazy fool Murdoch!" Allright, we'll take the stairs" Hannibal soothed him. As the team walked by 3rd Central, they pause to take a rest. As they chat, Eppy tries to convince Face to pledge to the Betas. The rest of the tteam stops to get a drink from the BAKER HOUSE 3RD CENTRAL SODA MACHINE (now in operation). Their break over, they continue down the hall while Eppy explains each room and babbles about the aesthetic values of Alvar Aalto. When the team reaches 3rd West, they see a small insectlike creature poring over a physics book. B.A. bursts "Hey, fool what you doin' studying during R/O?" The bug retorts "Shut up before I make you eat this book sucker!!"

Johnny woke up and looked around. He was still in the lab but the machine was gone. Johnny ran over to the calendar on the desk nearby-APRIL 25, 1959. "I've done it, I've done it," Johnny screamed at the top of his lungs. "You've done what, sir?" was the response of the short balding man who walked through the door. Johnny was immediately paranoid. He thought "Maybe he'll recognize me. I can't let them catch me now. I've got to get away." Johnny made a break for the door. Unexpectedly, in a strictly paternal effort to protect his lab, the old man jumped in his path, blocking the way. Johnny lowered his shoulder into the man's chest, knocking him off his feet. The old man stumbled back and fell, crushing his skull on the corner of the lab table. As Johnny pulled the door open, the room started spinning, and once again, he passed out.

Johnny woke up and looked around. The metal bars surrounding him were unmistakable. Johnny was in jail. "no, no, it can't be," he said. "What can't be?" Sergeant O'Callahan called to him. "What day is it?" Johnny asked. "Why it's April 25, what's your problem?" he answered. "No, the year! What year is it?" Johnny asked. "It's 1984. What are you on guy?" the sergeant replied. "But it can't be. I escaped. I took Professor Dimwinkle's machine back to 1959. I made it. I did! I did!" Johnny screamed hysterically. "Are you crazy? The old professor's been dead for 25 years. Some hood broke into his lab and killed him. Crushed his head in, he did." the sergeant explained. Johnny McAllister sat down and cried.

Time: R/O week

Scene: Freshman Picnic

B.A. was patiently waiting on line to get his Roast Beef. As his turn approached, he realized that they were only going to give him one slice. He decided he must make his move - Quickly he jumped the chef and grabbed the entire rump roast in his teeth as he punched out the two guarding CP's AS things settled down, people started feeling comfortable at this hole they call MIT. Many people watched B.A. eat and Murdoch encouraged all not to eat their mashed potatoes as they were America's strongest sign of nuclear deterrence. The boring speeches started and the new freshman all realized what they had gotten themselves into. Suddenly all was interrupted as someone shouted "LET THE RUSH BEGIN". The A-slut was immediately covered with frat-boys and in the period of ten seconds had already become a little sister in 14 frats. Murdoch, Face, B.A. and Hannibal snuck off to 24-012 to discuss their plan of attack. "O.K. Face, you read the Residence Book, give me a report.", Hannibal ordered. "Well, most of the frats across the river are of the asshole 'let's put rocks up our crevices to show we're men' mentality, so we can rule them out. I think we can eliminate the East side of campus, too because they're a bunch of weirdos. Murdoch might be interested in Senior House, but he has to keep his mind from messing with unnatural chemicals. Basically We'll cover Memorial Drive"

"excuse me. Are you a freshman? You'll have to sign in." the r/o worker said. After the whole team signed in, the conscientious worker asked B.A. "What kind of signature is Mr. T? What is your real name?" "My first name is Mr, my middle name is the little dot, and my last name is T," B.A. scowled. After the girl apologized, she asked the team if they wanted a tour of Baker House. "We'll let Eppy, one of most experienced girls, err I mean tour guides, take you." Eppy came bouncing along and said "Let's all get in the elevator." B.A. started screaming "Hannibal, I ain't gettin in no elevator with that crazy fool Murdoch!" Allright, we'll take the stairs" Hannibal soothed him. As the team walked by 3rd Central, they pause to take a rest. As they chat, Eppy tries to convince Face to pledge to the Betas. The rest of the tteam stops to get a drink from the BAKER HOUSE 3RD CENTRAL SODA MACHINE (now in operation). Their break over, they continue down the hall while Eppy explains each room and babbles about the aesthetic values of Alvar Aalto. When the team reaches 3rd West, they see a small insectlike creature poring over a physics book. B.A. bursts "Hey, fool what you doin' studying during R/O?" The bug retorts "Shut up before I make you eat this book sucker!!"

The window latch quietly slid open. Johnny still had not lost his touch. He climbed up through the window, his aging body now gliding like a snake. AS he rose to his feet he saw the safe sitting alone in a corner. The only light in the room was the cool moonlight pouring in over his shoulder from the now opened window. There was a faint aroma of a pipe in the air. The night watchman would not be due back for 5 minutes. Two was all he needed. Johnny took out his tools & went to work. Forty-five seconds later, the door of the safe popped open. "wow! There must be 20 G's in there," Johnny thought. He quickly stuffed the money in his bag and headed for the window. Then, perhaps because of carelessness, perhaps because his old eyes did not see as sharply as they used to, his foot caught the corner of a table sending the books on it to the floor. Immediately, The night watchman popped through the door brandishing a shiny revolver. Johnny reacted instinctively. Shooting his trusty .45 behind him for cover he dove for the window. It was a pretty rough landing but Johnny was in pretty good shape for a man of his age. Sure, he had gained a few inches around the waist but didn't everybody? As he got up and ran, he realized that he had broken his shoulder. He had to find someplace to lay low for a while. He was fairly sure that the watchman didn't get much of a look at him, but the heat would be pretty heavy for the rest of the night, at least. The best place for him would probably be the little used storehouse behind Pops Wagner's store.

"\$7.05 for dinner next year! What kind of sh t is this Hannibal?" Murdoch asked his leader. "Well it seems that MIT is trying f ck us over some more guys." he responded. "But Hannibal," Face pleaded, "everything here is so damn expensive. I can't afford my required meal plan." "He can't afford it, can't afford it, and his father's a alchoholic." B.A. and Murdoch taunted. "Allright men, that's enough, leave Face alone. It's time for a change. First, we need a plan." "Any suggestions?" "I say we go down and punch all of their heads in. Except for that dude Wayne because he be chill." B.A. offered. "I think B.A. has a good idea for a change. I could really get into stomping on their faces. Especially that bitch named ..." "Hey, vitamin B-nice Murdoch" Hannibal warned. "We need a better plan. One without violence. I've got an idea....."
